

I am one more intelligent american that is gisgusted by corporate activity in our country. The issue of corporate ownership deregulation hits every americans home via the many media sources today, we have a right to FREE knowledge and involvement in the proceeding decisions made at the FCC and by your Powell. Personally I would like any resources about the current regulations and the proposed changes made available to me as I am lining your pocketbooks through one medium or another. Please respond accordingly to my E-mail address, it would be appreciated...
